## EXPLANATORY NOTES

Most of the tables in this publication have been prepared entirely on a monthly basis, to provide easy comparison of data. With a few exceptions, annual and quarterly figures are expressed as Monthly Averages, and these can be converted to actual totals by multiplying by 12 and 3 respectively.

For example (from page 1 opposite):

Marriages in year 1958 -	
Monthly average	542
Therefore Annual total = $12 \times 542 =$	6,504
(Actual figure is 6,505)	
Births in March quarter 1959 -	
Monthly average	1,698
Therefore quarterly total = $3 \times 1,698 =$	5,094
(Actual figure is 5,095)	

The statistics as published can be adapted to give information in a number of different forms. For instance -

- (1) Details can be obtained for calendar or financial years as required, by addition of figures for the four relevant quarters.
- (2) Progress total for the year to date can be obtained by adding totals of quarters and months.  
e.g. If May figures are the latest published, total for the 5 months to May =  $3 \times$  monthly average of March quarter + April and May.

This procedure can be used to calculate corresponding figures for the same period of the previous two years, or similar information on a financial year basis.

Details of production on pages 6 - 9 are for selected items only. Particulars for several commodities of considerable importance in this State have been withheld because publication would reveal confidential information.

It should be noted that in many cases particulars for the "current" month are not available when this bulletin is issued. In such instances, the most up-to-date information is shown.

### ABBREVIATIONS USED

Throughout this bulletin the following symbols have been used -

n.a.	Not available	p	Preliminary figures
..	Nil (or less than 0.5)	r	Revised since previous issue

When the symbols "p" and "r" are placed in the column headed "Period" (as for example on page 11), they refer to all figures on that particular line.
